

NUFORM

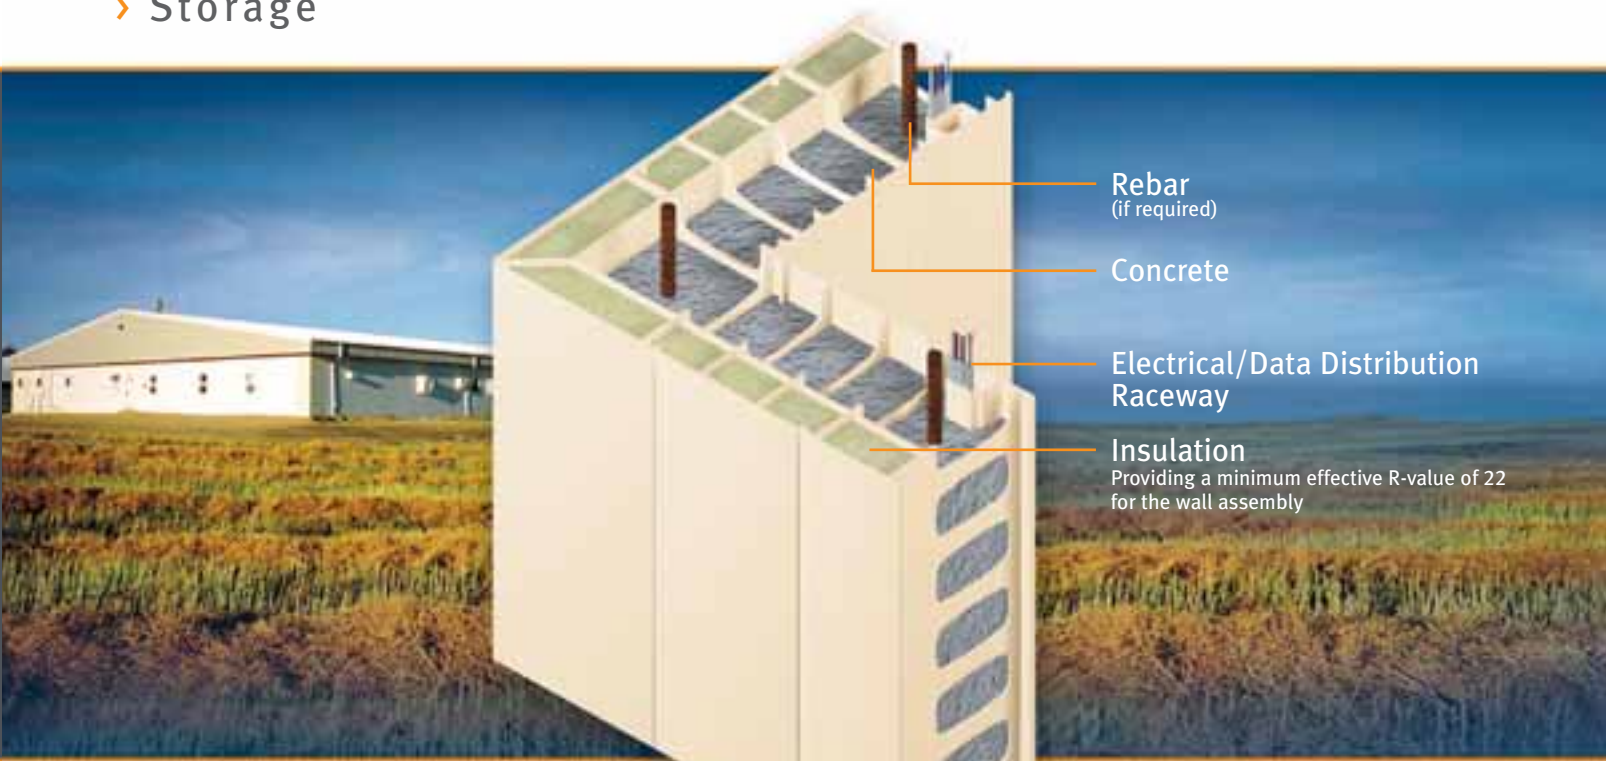

The Revolutionary Stay-in-Place
Concrete Wall Forming System

Agricultural Structures

- > Dairy Parlors
- > Hog Barns
- > Poultry Barns
- > Storage

Rigid polymer forms easily slide together, creating durable pre-finished walls that can be constructed quickly in any climate.

Once Conform is assembled, concrete is poured and the finished walls are ready for immediate use. The system also fits a variety of conventional roof structures, windows and door systems. Available in a range of sizes, this patented concrete finished wall system provides reliable, fast track construction that will last a lifetime. From small operations to large, whether you raise poultry, hogs or dairy cattle, or just want a superior agricultural building, Conform is the perfect choice.

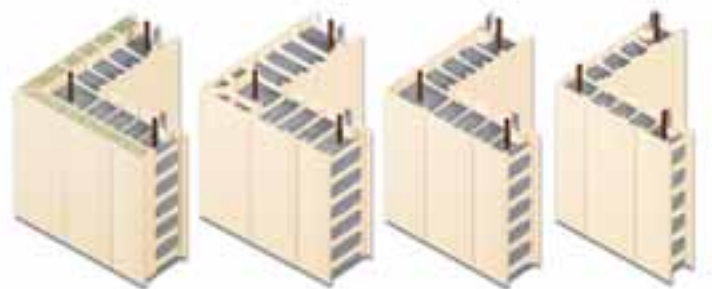

Also Featuring

Durable, Lightweight Paneling System
for Renovations & New Construction

The CF8i wall assembly has a minimum effective R-value of 22 (RSI 3.82) in cold climates.

CF8i (8"/200 mm)
Insulated Wall Form

CF8 (8"/200 mm)
Wall Form

CF6 (6"/150 mm)
Wall Form

CF4 (4"/100 mm)
Wall Form

A cost-efficient alternative to conventional construction assemblies such as insulated panel, precast, tilt-up and concrete block walls.

Prepared to order and assembled on site, the modular components facilitate rapid construction and can include built-in insulation, service raceways and rough openings. Thanks to Conform's innovative design and lightweight construction, design and finishing costs are greatly reduced. Our wall system also provides superior sound and thermal insulating properties as well as resistance to rodents and termites. Additional savings come from reduced construction schedules, earlier occupancy, energy efficiencies and maintenance-free environments.

> Construction

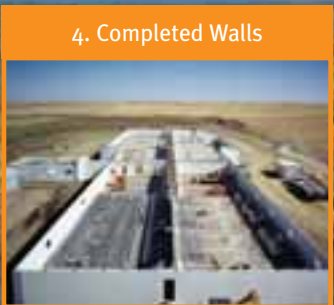

1. Wall Erection

2. Bracing

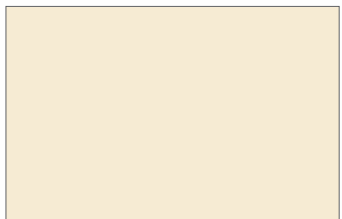

3. Concrete Pour

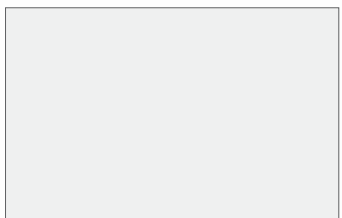

4. Completed Walls

> Features

- > Solid Concrete Construction
- > Quick On-Site Assembly
- > Proven Cost Savings
- > Unparalleled Energy Efficiency
- > Easy to Maintain
- > Rodent/Pest Resistant
- > Long-Term Durability:
Will not rust, corrode, flake, peel or rot! Resistant to extreme weather conditions and can be designed to handle earthquake and hurricane conditions
- > Superior Indoor Air Quality:
Mold and mildew resistant

Tan

White

The perfect choice for various specialty applications within the Agricultural market.

Several of the features and benefits pertain to the superior hygienic and sanitary demands of today's modern facilities, making the system ideal for some of the specialty uses shown below.

Feed Mill

Dairy Subway

Robotic Milking Station

Egg Cooler Room

Holding Pen

Root Cellar

Aquaculture Tanks

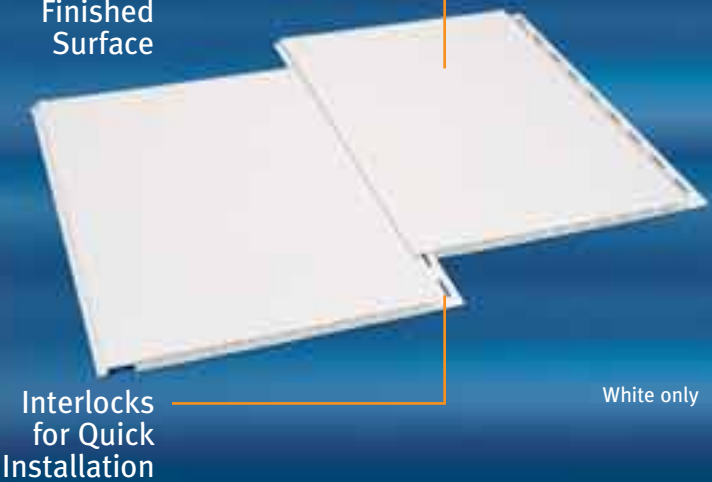

Innovative, lightweight panels fasten directly to an existing wall or truss ceiling.

Reline, when used as a ceiling panel, is the perfect complement to a Conform structure and the ideal choice for renovating existing facilities. Easy to install using a wide range of optional accessories and trim components, Reline makes it easy to finish walls and ceilings in new construction or for renovations throughout the building.

> Advantages

Durable
Finished

Interlocks
for Quick
Installation

White only

> Features

- > Specifically designed for walls and ceilings in Agricultural Buildings
- > Rigid panels come in a variety of standard lengths, are lightweight and easy to install
- > Superior long-term performance and virtually maintenance-free
- > Brightens the interior appearance of the building
- > Panels will not warp, rust or corrode and never need to be painted!
- > Easy installation with concealed fasteners providing a smooth, clean finish while improving ventilation flow
- > Trims and accessories available
- > Supports insulation loads

Wall & Ceiling Application

Poultry Barns

Our mold and mildew resistant buildings improve indoor air quality. The walls can be quickly and easily washed, allowing you to maintain the strict cleanliness demanded of today's modern agricultural facilities.

Dairy Parlors

The solid construction of our wall system ensures your cattle are better protected from the elements and provides an extremely hygienic and durable wall assembly for this demanding environment.

Hog Barns

The superior insulating properties of this high quality wall system help keep animals healthy while reducing energy costs.

Storage

(Fruit, Vegetable, Feed, Storage, Shops, etc.)

Due to the superior solid concrete construction, your storage buildings will look great in any climate and last a lifetime. Exterior walls will not rust, corrode or peel.
