

Heavy Duty Reversible Paneling System for Retrofit & New Construction

Durable, smooth surface for minimal maintenance

Reversible construction for added flexibility and longevity

Interlocking fastening system for quick and easy installation

Innovative built-in expansion joint so panels will not warp

Innovative, lightweight panels that fasten directly to an existing wall

Ideal for All Vehicle Wash Applications

Specifically designed for vehicle wash interiors using CMU construction. RENU panels are **reversible**, making it the ideal product for **self-serve bays** and other areas of your car wash that are likely to take abuse.

Features

- › Quick and easy installation; no gluing required
- › Panels fasten directly to an existing wall
- › Will not warp, rust or corrode and never needs to be painted
- › Smooth surface brightens the interior of the building
- › Superior long-term performance and virtually maintenance-free
- › Durable finish withstands harsh chemicals
- › Outperforms ceramic tiles, fiber-reinforced panels (FRP) and fiberglass spray
- › Meets Class A interior finish requirements
- › Standard and custom lengths available
- › Trim components and accessories available
- › Fast delivery times

Try the REVIVE Advantage*
