

ROBOT ROOMS

BY  **NUFORM**[®] The Ideal Solution for Modern Dairy Facilities

The **CONFORM**[®] building system by Nuform Building Technologies Inc. is purpose-built to meet the demands of today's automated dairy operations. Designed for speed, sanitation, and flexibility, CONFORM[®] delivers a clean, bright, and highly controlled environment that supports optimal robot performance, animal health, and milk quality.

CONFORM[®]'s modular panel system allows dairy robot rooms to be constructed **quickly and efficiently**, dramatically reducing onsite labor and overall project timelines. With **fast material delivery** and simple installation, CONFORM[®] keeps automation projects on schedule — even under tight seasonal windows. Its lightweight yet durable design makes it ideal for **retrofits, low-roof conditions, and space-restricted facilities** where traditional construction methods fall short.

FEATURES & BENEFITS

Quick to Install

Durable

Easy to Clean

Bright Finish

Customizable

Mold & Mildew Resistant

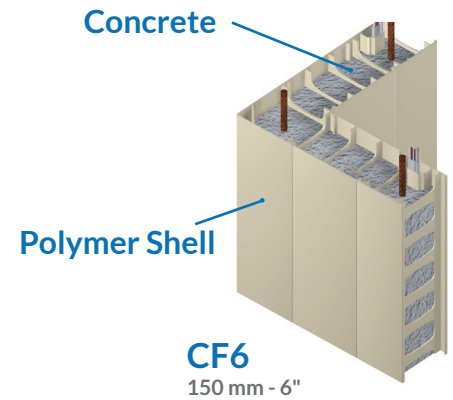

Build smarter. Build cleaner. Build with CONFORM[®]

Solid concrete technology encased in stay-in-place PVC formwork delivers the best of both worlds for modern dairy robot rooms – unmatched structural strength paired with a bright, hygienic, easy-to-clean interior surface.

The concrete core provides long-term durability and impact resistance, while the smooth PVC finish resists moisture, mold, and bacteria, supporting strict sanitation protocols in washdown environments. Fully customizable to suit any robotic equipment manufacturers like Lely, DeLaval, BouMatic and more, this system allows precise layouts and heights without compromise.

Designed for today's automated dairies, it creates a clean, controlled, food-grade space that protects milk quality, improves equipment performance, and meets the expectations of a modern dairy facility.

Also available in: **CF8** 200 mm - 8" **CF4** 100 mm - 4"

FEATURES

- Extremely Hygienic and Impact Resistant Wall
- Pre-Finished permanent PVC forming panels
- Customizable for all dairy robotic equipment manufacturers
- Ideal for low-roof and retrofit applications
- Quick Delivery
- Cost Effective - No Finishes Required

BENEFITS

- ✓ Bright & Easy to Clean
- ✓ Quick & Easy to Build
- ✓ Mold-resistant construction
- ✓ Long Term Durability
- ✓ CFIA, FDA Compliant
- ✓ Food Safe & Bio Security
- ✓ Rodent & Pest Resistant

DURABLE, COST-EFFECTIVE PANELING SYSTEM FOR RETROFIT & NEW CONSTRUCTION

RELINE 12"

RELINE PRO 18"

Interlocking fastening system for quick and easy installation

Durable, smooth surface for minimal maintenance

Concealed fasteners for a clean finish

Heavy duty slotted fastener leg to accommodate expansion and contraction

Innovative, lightweight panels that fasten directly to an existing wall or truss ceiling.

When used as a ceiling panel, **RELINE** is the perfect complement to **CONFORM**, our concrete wall forming system for new construction. Ask us about this great innovation!

Available in standard + custom lengths and full range of accessories.
